RESEARCH INTERESTS

My research interests generally lie in developing tools to apply fundamental combustion insights to solve engineering problems. My recent work involves developing experimental methods to analyze intermediate species at practical combustion conditions. I am also interested in developing methods to analyze computational models, particularly kinetic models of combustion.

EDUCATION

Ph.D., Mechanical Engineering, University of Connecticut, 2014
M.S., Mechanical Engineering, University of Connecticut, 2010
B.S.E., Aerospace Engineering, Case Western Reserve University, 2009

PROFESSIONAL EXPERIENCE

Visiting Assistant Professor, University of Connecticut 2014–Present
Conducting research on the combustion kinetics of alternative and traditional fuels. Teaching undergraduate courses in thermal-fluids engineering.

Graduate Research Assistant, University of Connecticut 2009–2014
Undergraduate Research Assistant, Case Western Reserve University 2007–2009
[Combustion Diagnostics Laboratory](#) — Director: C.-J. Sung
Conducting experimental and computational studies of the ignition properties of several alternative fuels and foundational fuels, with focus on engine-relevant conditions. Designing a species sampling apparatus for time-resolved species measurements in the rapid compression machine, using gas chromatography/mass spectrometry to identify and quantify combustion intermediates. Analyzing kinetic models for combustion to determine the parameters controlling prediction of ignition delay and improve the ability of the models to predict combustion events.

OTHER PRESENTATIONS	B.W. Weber and C.J. Sung. <i>Analysis of Hydrocarbon Fuels using Gas Chromatography/Mass Spectrometry</i> . Summer Undergraduate Research in Energy Sciences Program, Dominion Energy East Ohio Branch, Cleveland, OH, August 2008.	
TEACHING EXPERIENCE	University of Connecticut, Storrs, CT, USA Fall 2014 — Fundamentals of Engineering Thermodynamics Spring 2013 — Introduction to Mechanical Engineering (Instructor of Record)	
PROFESSIONAL SERVICE	Combustion Energy Frontier Research Center (CEFRC) Lead Chair, Junior Associates Committee Coordinate monthly teleconferences for graduate students and post-doctoral researchers in the CEFRC where junior members of the CEFRC present recent research results to the group. Act as the liaison between the Center's principle investigators and the junior members.	2012–Present
	U.S. Department of Energy Member, EFRC Newsletter Editorial Board Contribute articles to the Energy Frontier Research Centers (EFRC) newsletter describing recent scientific advances resulting from EFRC research, including: "Burning Butanol in a Better Engine" "The Advantage of Renewable Fuels in High-Efficiency Engines" "Confined Catalysts Last Longer" The audience for the articles is scientifically literate, but not expert in the fields relevant to each article. Edit articles written by other board members for factual and grammatical correctness.	2013–Present

AWARDS AND
FELLOWSHIPS

Doctoral Dissertation Fellowship, University of Connecticut, 2014
Graduate Predoctoral Fellowship, Department of Mechanical Engineering, 2013
Graduate Teaching Fellowship, Department of Mechanical Engineering, 2013
Graduate Assistantship in Areas of National Need, University of Connecticut, 2010
Fred H. Vose Prize, Department of Mechanical and Aerospace Engineering, 2009
Summer Undergraduate Research in Energy Sciences Grant, Case Western Reserve University, 2008
