

Bryan W. Weber

CONTACT INFORMATION	Department of Mechanical Engineering University of Connecticut 191 Auditorium Road U-3139 Storrs, CT 06269 USA	 bryan.w.weber@gmail.com  +1-860-486-8043  +1-412-443-6447  bryanwweber.com
EDUCATION	Ph.D., Mechanical Engineering, University of Connecticut, 2014 M.S., Mechanical Engineering, University of Connecticut, 2010 B.S.E., Aerospace Engineering, Case Western Reserve University, 2009	
PROFESSIONAL EXPERIENCE	Assistant Professor in Residence , <i>University of Connecticut</i> 2016–Present Visiting Assistant Professor , <i>University of Connecticut</i> 2014–2016 <ul style="list-style-type: none">• Conducting research on the combustion kinetics of alternative and traditional fuels• Developing tools to improve reproducibility in experimental works• Teaching undergraduate courses in thermal-fluids engineering• Mentoring undergraduate students in the capstone design project Lead Developer , <i>UConnRCMPy</i> 2015–Present <ul style="list-style-type: none">• Developing an open-source data analysis package for rapid compression machine experiments to encourage and improve reproducibility in experimental works• Collaborating with other researchers to improve and extend the package• Code is available on GitHub: https://github.com/bryanwweber/UConnRCMPy Lead Developer , <i>ThermoState</i> 2016–Present <ul style="list-style-type: none">• Developing an open-source package to evaluate thermodynamic properties of common materials• Used in several undergraduate Thermodynamics courses, with strong student approval• Code is available on GitHub: https://github.com/bryanwweber/thermostate Co-Lead Developer , <i>PyKED</i> 2016–Present <ul style="list-style-type: none">• Implemented a Python interface to the ChemKED database format for chemical kinetics experiments• Collaborating with other researchers to define the database format, project governance, and community standards• Code is available on GitHub: https://github.com/pr-omethe-us/PyKED Contributing Developer , <i>Cantera</i> 2013–Present <ul style="list-style-type: none">• Contributing source code to the open-source software toolkit for chemical kinetics, thermodynamics, and transport processes• Assisting users with usage of Cantera in the online support group• Code is available on GitHub: https://github.com/Cantera/cantera	

Graduate Research Assistant, *University of Connecticut* 2009–2014
Undergraduate Research Assistant, *Case Western Reserve University* 2007–2009
Combustion Diagnostics Laboratory — Director: C.J. Sung

- Conducted experimental and computational studies of the ignition properties of several alternative fuels and foundational fuels, with a focus on engine-relevant conditions.
- Designed a species sampling apparatus for time-resolved species measurements in the rapid compression machine, using gas chromatography/mass spectrometry to identify and quantify combustion intermediates.
- Analyzed kinetic models of combustion to determine the parameters controlling prediction of ignition delay and to improve the ability of the models to predict combustion events.

TEACHING
EXPERIENCE

University of Connecticut, Storrs, CT, USA

Assistant Professor in Residence

Three-time recipient of Provost's Teaching Commendation

- Applied Thermodynamics Spring 2016–2018
- Combustion for Energy Conversion Fall 2016
- Fluid Dynamics 1 Fall 2015, 2017
- Fluid Dynamics 2 (Compressible Flow) Spring 2018
- Senior Capstone Design Project Lecturer/Mentor 2014–2018
- Thermodynamic Principles Fall 2014–2017; Spring 2015–2016; Summer 2017

PROFESSIONAL SERVICE

- Combustion Energy Frontier Research Center (CEFRC)* 2012–2014
Lead Chair, Junior Associates Committee
- Coordinate monthly teleconferences for graduate students and post-doctoral researchers in the CEFRC where junior members of the CEFRC present recent research results to the group.
 - Act as the liaison between the Center's principal investigators and the junior members.

Member, EFRC Newsletter Editorial Board

- Contribute articles to the Energy Frontier Research Centers (EFRC) newsletter describing recent scientific advances resulting from EFRC research, including:
 - “Burning Butanol in a Better Engine”
 - “The Advantage of Renewable Fuels in High-Efficiency Engines”
 - “Confined Catalysts Last Longer”
- Edit articles written by other board members for factual and grammatical correctness.

Journal Referee

- Combustion and Flame
- Energy & Fuels
- Proceedings of the Combustion Institute
- Fuel
- Combustion Science & Technology
- Industrial & Engineering Chemistry Research
- Society of Automotive Engineers World Congress
- Measurement
